

# TMHC Insulin Centenary Conference and Macleod Workshop

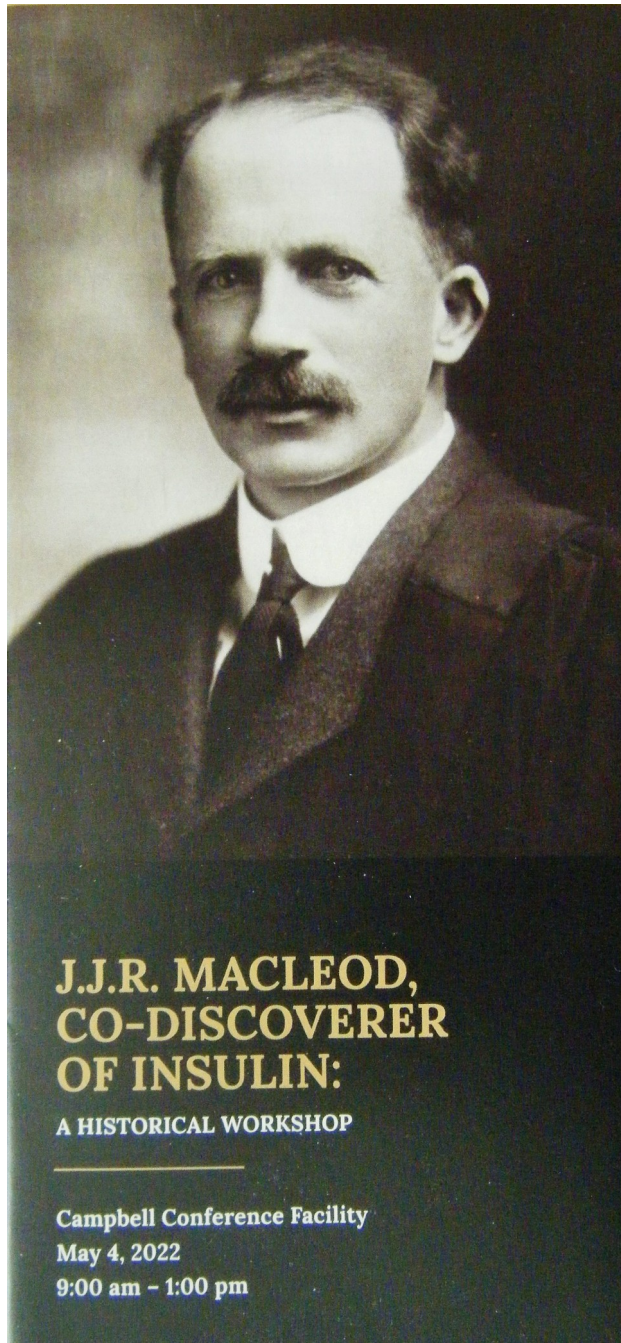

3 and 4 May, 2022

58

Simple Legend:  
TMHC Insulin Centenary meeting

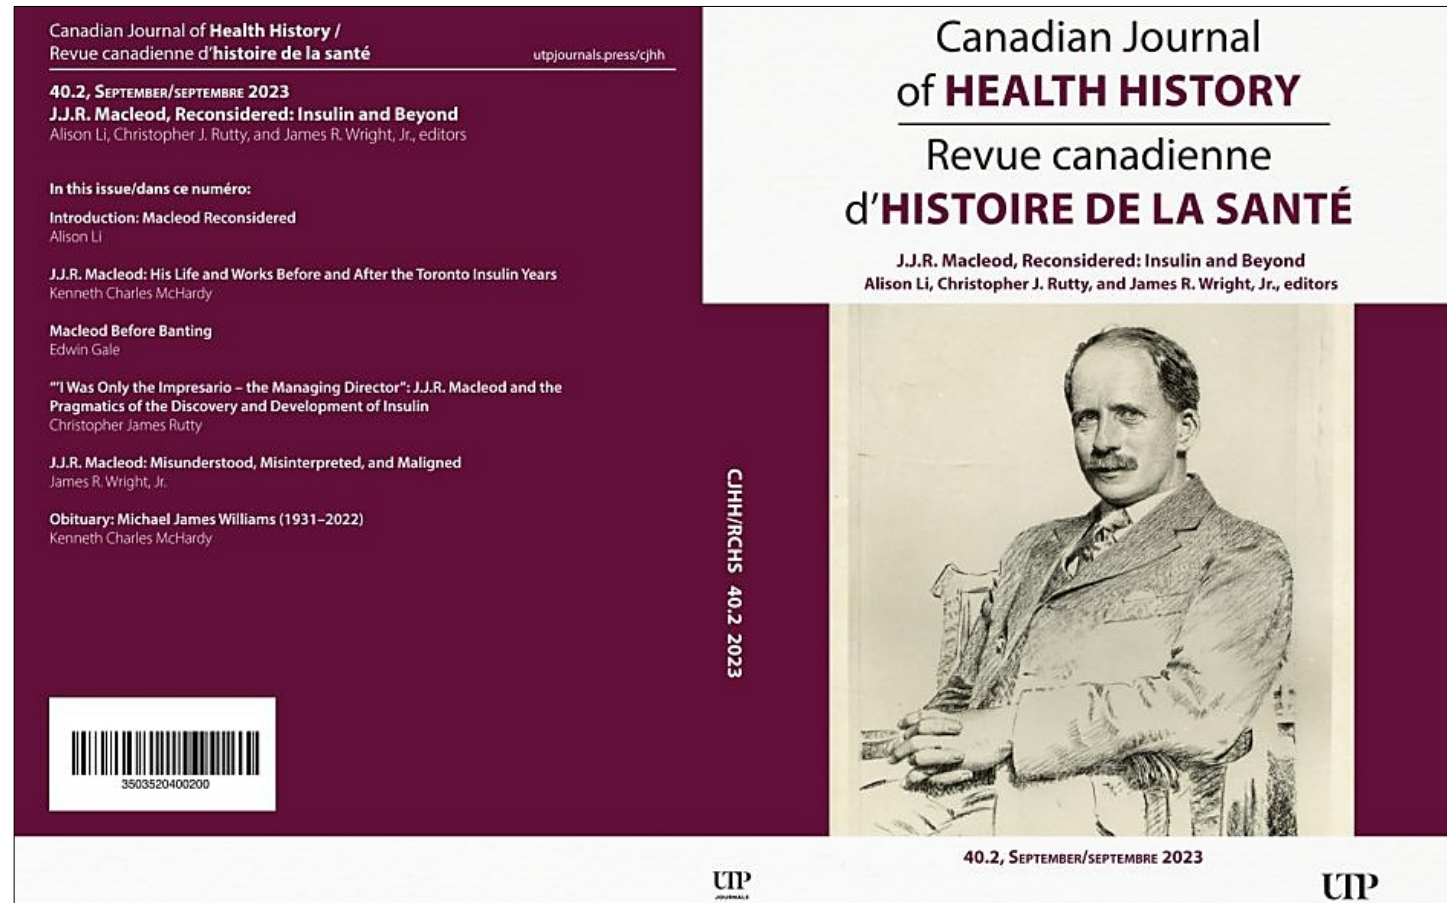

Extended Legend:  
Programme cover for TMHC Insulin conference  
at University of Toronto on May 3, 2022. This  
marked 100 years to the day since Macleod got a  
standing ovation at the American Association of  
Physicians Meeting in Washington, following his  
announcement of the discovery of clinically  
useful insulin in his Toronto laboratory.

Distinguished guests at Nobel Centenary dinner

*[image courtesy of Indigo Events]*

Extended Legend:

Among the distinguished guests greeted on behalf of Toronto Medical Historical Club by Dr John Dirks (far right) at the Nobel Centenary Dinner in Toronto, 27 Nov 2023 were, from the left: Dr Arthur McDonald (Canadian Nobel Laureate in Physics, 2015), Professor Erling Norrby (Nobel medical historian, Stockholm), Her Excellency Signe Burgstaller (Swedish Ambassador to Canada), John Polyani (University of Toronto Nobel Laureate in Chemistry, 1986).

# Toronto Four celebrations

Aberdeen 6 Sep 2024

### Simple Legend:

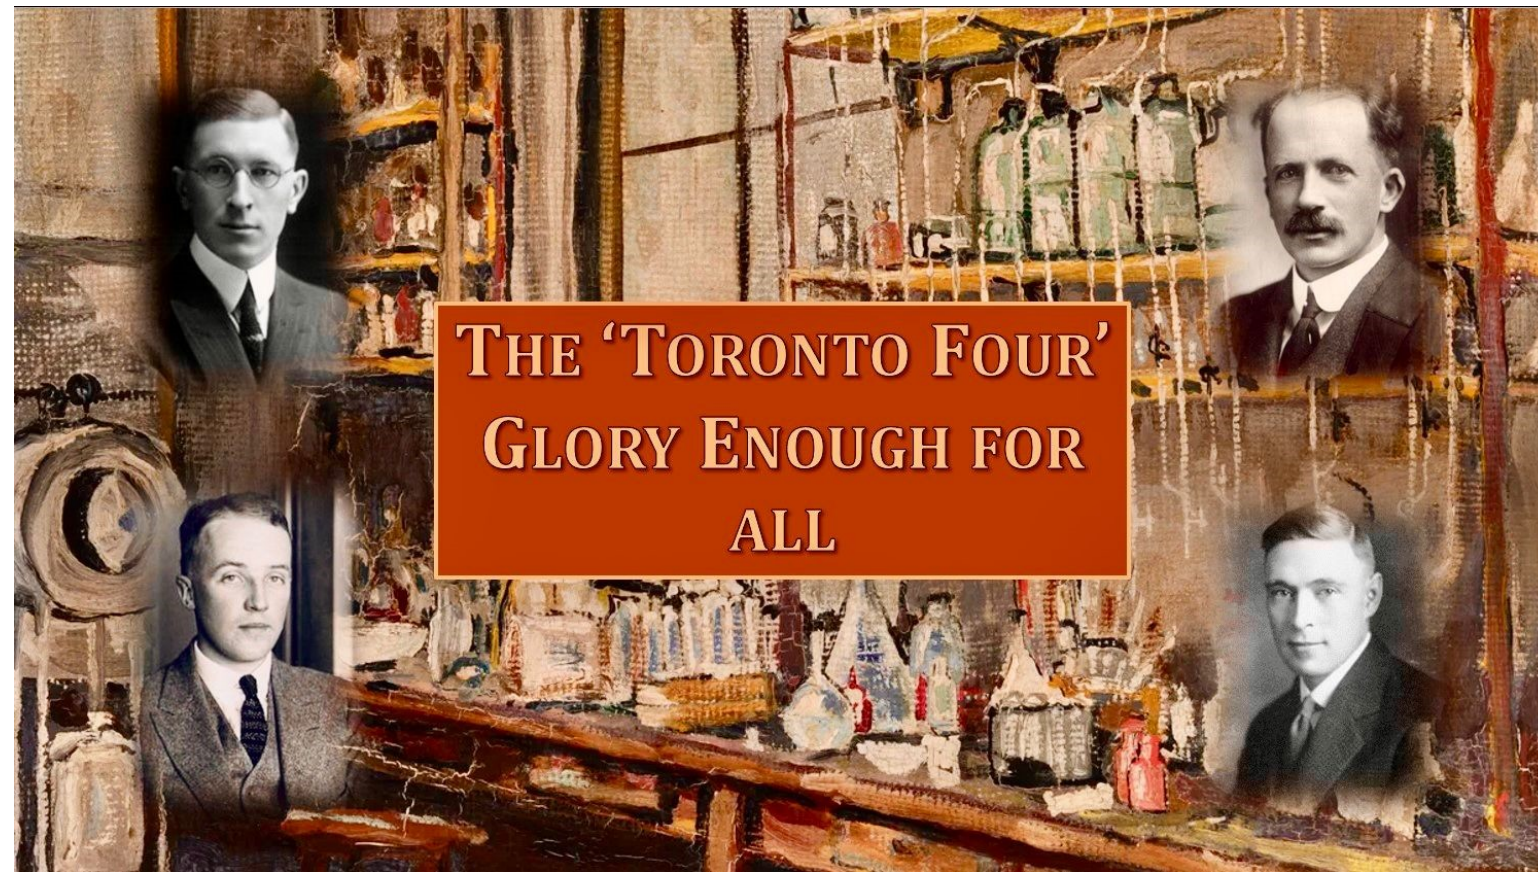

The Toronto Four plaques unveiled  
[image courtesy of Aberdeen Photo]

### Extended Legend:

Unveiling of the Toronto Four plaques immediately behind Macleod statue in Aberdeen's Duthie Park on 6 Sep 2024, the 148<sup>th</sup> anniversary of Macleod's birth. The assembled party are:

1. Kimberlie Hamilton (Macleod Memorial Statue Society, MMSS).
2. Christopher Rutty (Historian, Toronto).
3. David Cameron (Lord Provost of Aberdeen).
4. Gary Golberg (Toronto Medical Historical Club, TMHC).
5. Erling Norrby (Nobel Medical Historian, Stockholm).
6. John Otto (President MMSS).
7. John Dirks (TMCH, Toronto).
8. Ken McHardy (Retired Diabetes Specialist, Aberdeen).
9. Peter Kopplin (TMHC, Toronto).
10. Sylvia Halkerston (Lord Dean, Aberdeen Burgesses).
11. James Wright (Retired Pathologist and Insulin Historian, Calgary).
12. Alison Li (TMHC Hono
- Duncan ).

Simple Legend:

Aberdeen 'Toronto Four' conference

*[image courtesy of Macleod Memorial Statue Society]*

Extended Legend:

This was the 'backdrop' screen used at the Toronto Four symposium held on the University of Aberdeen's King's College Campus on 6 Sep 2024, following the unveiling of the plaques at Duthie Park. The contributions of each member of the Toronto Four were explained and leading Nobel medical historian, Professor Erling Norrby of Stockholm, gave a paper on the appropriateness of the 1923 Medicine or Physiology Nobel Prize award to Banting and Macleod for the discovery of insulin.

Simple Legend:

Toronto Four interpretation plaque

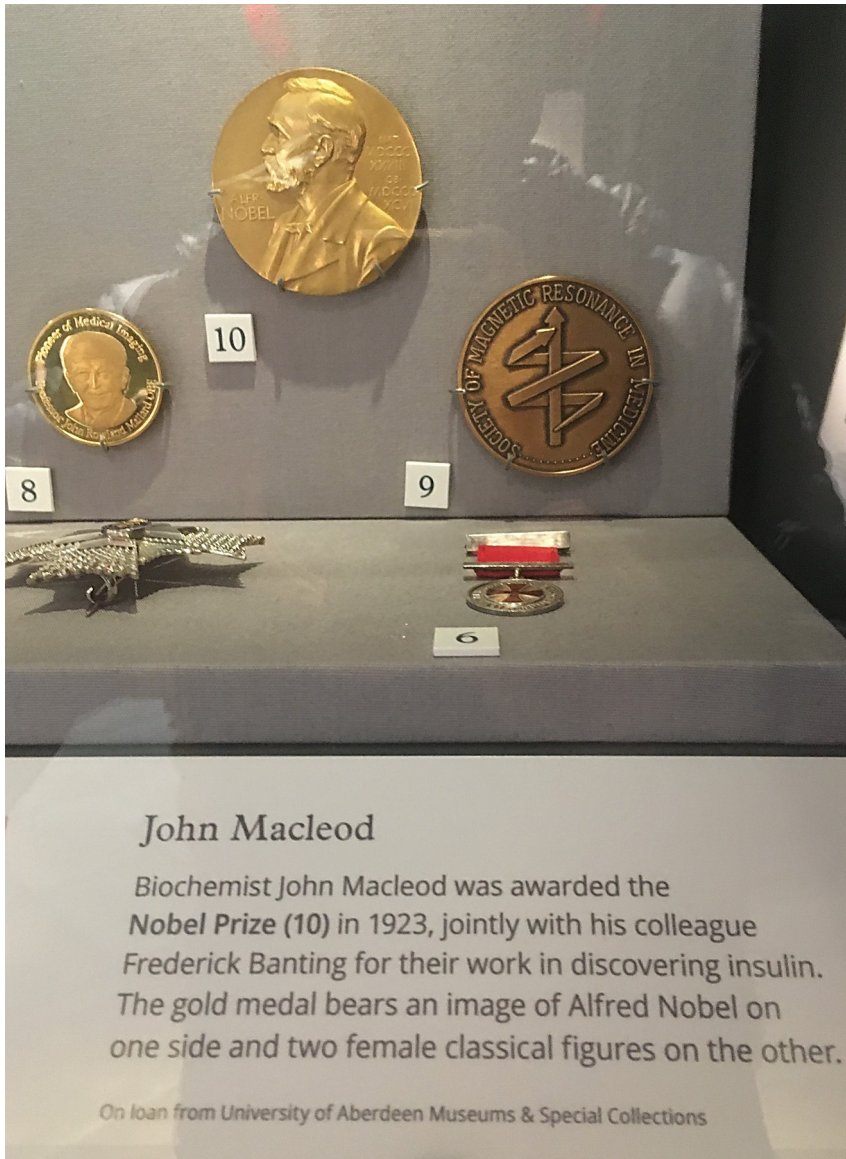

*[image courtesy of Macleod Memorial Statue Society]*

Extended Legend:

This is the bronze interpretation plaque embedded in the path under the wall behind Macleod's statue which briefly explains the contributions of the Toronto Four in bringing insulin to the world. It repeats a quote from Professor Llewellys Barker of Johns Hopkins, Baltimore who, addressed the company of some 400 guests at the Nobel Gala Dinner held in the University of Toronto's Hart Hall, on 26 November, 1923. Presumably aware of the tensions regarding credit for the medical breakthrough, Professor Barer said, "In Insulin, there is glory enough for all". 'Glory Enough for All' was the title of an acclaimed docu-drama made for Canadian television in 1988, based largely on Professor Bliss's 1982 book, 'The Discovery of Insulin'.

# Provost Skene's House Museum

Macleod displays

Simple Legend:  
Macleod's Nobel Medal

Extended Legend:  
Professor Macleod's Nobel Prize medal is on long-term loan from the University of Aberdeen for display in Provost Skene's House Museum in the 'World Life Savers' collection on the first floor.
